

SPACING SEEDS

A Florida vegetable farmer wants to plant yellow squash in a small plot of land.
Help him create the planting plan for his squash garden.

Planting Instructions

SEED DEPTH:

$\frac{1}{2}$ inch deep

ROW SPACING:

3 feet

SEED SPACING:

6 inches

1. Calculate the perimeter of the space.
2. Calculate the area.
3. How many horizontal rows could fit in this space?
4. How many seeds could be planted if the rows were horizontal?
5. How many vertical rows could fit in this space?
6. How many seeds could be planted if the rows were vertical?
