PROBLEM SOLVING

Underline what you know and draw a picture to solve the problem.

1. Rebecca and Todd harvested **12** yellow squash from their school garden. While they ate lunch, a rabbit came and ate **5** of them. How many squash are left in the basket?
2. Samantha planted **8** yellow squash seeds in the garden bed and Jason planted **6** squash seeds. Only **4** of the seeds sprouted. How many seeds did Samantha and Jason plant? How many seeds did not sprout?
3. Yellow squash was on the school lunch menu today. Mrs. Sherman has **18** students in her class. **15** of the students ate the squash. **12** of these students had tried squash before. How many students tried squash for the first time?
